ELIGIBILITY

Participation is open to active duty members of the Federal Dental Services, Reserves actively participating in the Reserve Program, and on a space available basis to all other personnel including civilians. Specific courses may have special limitations.

COURSE FEE

Active duty Department of Defense personnel (i.e. Navy, Army, Airforce) including active duty foreign (i.e. Canadian) and retired (Navy, Army, Air Force) will not be charged a course fee. Reservists serving a ACDUTRA while attending courses in military uniform will not be charged with proof of valid orders and identification card. Civilian, Ready-Reservist, Reservist (not on ACDUTRA), Coast Guard, Contract Dentist and Public Health Service personnel will be charged a course fee. Fee rates are \$50.00 per day multiplied by the number of days of the course. The full course fee will apply to either full or partial attendance at the courses. Course fee will be collected during check-in procedures at the beginning of the course. Payments can be made by check to **U.S. Treasury**. Credit cards and cash are not accepted for payment. Fees are non-refundable.

APPLICATION

Applications must be submitted in timely manner prior to each course to ensure availability of seat.

Due to quota limitations, attendance is not guaranteed unless a confirmation letter has been received.

Check-In Procedure:

All personnel are required to check in with Continuing Education at **0700 the first day of the course**. At that time all TAD orders and course fees will be collected. Uniform of the day will be working blues, summer white, service khaki or the appropriate seasonal service uniform. For other services other than U.S. Navy, the uniform is the appropriate service equivalent and appropriate attire for civilians.

ORDERS

All orders should read as follows: "Reporting Instructions: Report to CO, NDC Southwest, 2310 Craven Street, Naval Station, San Diego, CA 92136-5596," and "Government Messing Not Available" (**Officers Only**).

ANNUAL TRAINING/ACTIVE DUTY TRAINING, NAVAL RESERVE

All Naval Reserve Officers and Enlisted personnel desiring a quota in a course MUST submit the course application form contained in this brochure through their respective REDCOMs.

This application must be received prior to the application cut-off date to ensure availability of a seat for the course requested. Annual Training or Active Duty Training Orders should not be requested or processed UNTIL you have received WRITTEN confirmation of a course quota. **Note: If you intend to combine a course with or include it during Annual Training, you must contact your respective REDCOM and the Reserve Liaison Office at Naval Dental Center Southwest, San Diego.** Approval from the Course Coordinator or Course Director, for a course, does not include approval for Annual Training. **Plan ahead.** The Reserve Liaison Officer or the assistant may be reached by calling DSN 524-8264, Commercial (619) 524-8264. **Course applications are to be mailed to the address above, Attn: Administration Department (Code 012).**

CONTINUING EDUCATION CREDITS

Continuing Education Credits are given in accordance with the Academy of General Dentistry, American Dental Association and California Continuing Education. Full course credit cannot be given to early departees.

The US Navy is an ADA CERP Recognized Provider

DENTAL TREATMENT PLANNING FOR GENERAL DENTISTS

05-08 November 2001

Quota: 40

05 October 2001 - Application Cut-off

Course Data Processing Code:
887V-99010

Course Identification Number:
B-6C-1011

Director:

CAPT J. A. Smith, DC, USN, DMD, Diplomate, Federal Service Board of General Dentistry; Director, Advanced Clinical Programs

Eligibility: Federal agency dentists only. (One week before the course begins, civilian dentists can contact the continuing education office by telephone to determine if the space is available for enrollment.)

Course Fee: Non federal agency dentists: \$200.00. Checks are accepted. Make checks payable to U.S. Treasury. The course fee will be collected during check-in procedures on the first day of the course. Fees are non-refundable.

Course Description: Recent changes in the Navy Dental Corps with the advent of phased dentistry, multi-chair treatment and greater opportunity for independent practice is driving a need for general dentists to become more proficient in treatment planning skills. This innovative four-day course links the dental specialties in a multidisciplinary approach to treatment planning concepts and practices. The course is divided into two parts. The first part reviews current preventive, diagnostic, restorative techniques and materials and their impact on the treatment planning process. The second part allows groups of participants to develop, present and discuss treatment plans for selected cases requiring a multidisciplinary approach.

Anticipated Learning Outcomes:

- Properly request and evaluate consultations to and from the various specialties.
- Discuss current preventive, diagnostic, and restorative techniques and materials.
- Construct and judge treatment plans to ensure that all phases of dentistry are integrated and that a total patient approach has been followed.

Continuing Education Credit: Max hrs. 28

MINOR ORAL SURGERY

13-15 November 2001

Quota: 130

Course Data Processing Code:
887U-99010

Course Identification Number:
B-6C-1005

Director:

CAPT G. S. Benson, DC, USN, DDS
Diplomate, American Board of Oral and Maxillofacial Surgery

Eligibility: Federal agency dentists, Active and Reserve. Non federal agency dentists on a space available basis.

Course Description: This course is designed for the general practitioner and the exodontist who is interested in the latest advances in clinical outpatient oral surgery. Topics covered will include medical evaluation of the surgical patient, management of the medically compromised patient, treatment of medical emergencies in the dental operator, basic and complicated exodontia technique, management of post-operative complications, recognition and treatment of odontogenic infection, antibiotic therapy, biopsy technique, diagnosis and treatment of facial fractures, management of facial soft tissue trauma, dental implants, extraoral/panoral radiography, overview of orthognathic surgery and the recognition of common oral pathology.

Anticipated Learning Outcomes:

- Diagnose and treatment plan common oral surgical cases.
- Recognize the medically compromised patient and manage medical emergencies in the dental operator.
- Recognize situations requiring referral to exodontists, oral and maxillofacial surgeons, or coordination with other specialties.

Continuing Education Credit: Max hrs. 21

NITROUS OXIDE/OXYGEN INHALATION SEDATION

04-05 December 2001

Quota: 30

Course Data Processing Code:
230U-99010

Course Identification Number:
B-6C-2000

Director:

CAPT G. S. Benson, DC, USN, DDS
Diplomate, American Board of Oral and Maxillofacial Surgery

Eligibility: Active Duty Only. Federal agency dentist on a space available basis.

Course Description: This course is designed for the dental officer who is interested in utilizing Nitrous Oxide and Oxygen Inhalation Sedation in their practice. Among the topics covered will be the pharmacology of nitrous oxide; advantages and disadvantages of its use; indications and contraindications; prevention, recognition, and management of complications; patient evaluation and risk assessment; airway management; physiologic monitoring of the patient; basic components and function of inhalation sedation equipment; and nitrous oxide and oxygen inhalation technique. The course meets the guidelines established by the ADA for teaching inhalation sedation with nitrous oxide.

Anticipated Learning Outcomes:

- Recognize the indications for the use of nitrous oxide sedation.
- Understand the pharmacology of nitrous oxide sedation.
- Safely administer nitrous oxide sedation to appropriate dental patients.
- Understand the environmental hazards and abuse issues related to nitrous oxide.

Continuing Education Credit: Max hrs. 14

DENTAL ADMINISTRATION FOR PETTY OFFICERS

07-09 January 2002

Quota: 20

Course Data Processing Code:
433G-99020

Course Identification Number:
B-330-0010

Director:

DTC D. Chambliss, USN

Eligibility: Active duty Navy dental technicians E4 – E5 Petty Officers (Except for 8703).

Course Description: This course is designed to provide basic guidance for administrative procedures and LPO clinic supervision. The course will provide information on Correspondence Manual, Enlisted Evaluation, Career Counseling, Personal Awards, Standard Subject Identification Codes, Discipline, and Dental Clinic supervision.

Anticipated Learning Outcomes:

- Have a general understanding of various dental administrative procedures.
- Have knowledge of Navy Correspondence, Enlisted Performance Evaluation, and Personal Awards writing techniques.
- Identify the contents and maintenance requirements of official publications, know the Navy filing requirements; and understand the recommended correspondence management practices.

OPERATIVE DENTISTRY

14-16 January 2002

Quota: 130

Course Data Processing Code:
887M-99010

Course Identification Number:
B-6C-1007

Director:

CDR G. Imamura, DC, USN, DDS, MS
Department Head, Operative/Preventive Dentistry

Eligibility: Federal agency dentists, Active and Reserve. Non federal agency dentists on a space available basis.

Course description: This course will review the basic principles of Operative Dentistry with consideration of new techniques and dental materials. Current concepts in cariology and caries risk assessment will be an integral part of the course. The philosophy of conservative dentistry as well as helpful hints for the more difficult cases will be presented. Topics will include: Non-invasive and remineralization techniques, amalgam restorations, retentive pins and alternative retention mechanisms, glass ionomer cements and clinical techniques, composite/dentin bonding systems and techniques, esthetic dentistry to include vital bleaching, porcelain veneers, resin and porcelain inlays/onlays.

Anticipated Learning Outcome:

- Integrate caries risk assessment and non-invasive treatment modalities with conventional restorative treatments.
- Incorporate new techniques and materials into the daily practice of operative dentistry.
- Appreciate the role of operative dentistry in the future of dental health care delivery.

Continuing Education Credit: Max hrs. 21

DENTAL IMPLANT LABORATORY TECHNIQUE

COURSE FOR DENTAL TECHNICIANS

28-29 January 2002

Quota: 12

Course Data Processing Code:
433F-99010

Course Identification Number:
B-331-0024

Director:

CDR M. Gentile, DC, USN, DDS
Director, Area Dental Laboratory, Southwest

Eligibility: Active duty Navy enlisted laboratory technicians who have completed formal Basic and Advanced Dental Laboratory "C" school and qualified civilian laboratory technicians employed by Navy dental laboratories.

Course Description: This two day course is designed primarily for laboratory technicians with minimal or no prior implant experience who desire to broaden the scope of their laboratory practice. The latest techniques in implant dentistry will be presented. A hands-on workshop will be conducted during which the participants will complete the following restorations on laboratory models:

1. Radiographic and surgical guide fabrication
2. 3-unit porcelain fused to metal fixed partial denture utilizing the multi-unit abutment
3. Fabricate a removable prosthesis retained by implant supported attachments

Restorations and models will be returned to participants so that they may be used for patient education and further training at their facilities.

All materials for wax-up and casting will be provided; however, participants will be required to bring basic laboratory and porcelain application instruments.

Anticipated learning outcomes:

- Understand the biologic basis for dental implants and how they differ from natural teeth
- Understand the important role of the laboratory technician in the preoperative preparation of diagnostic wax-ups and master casts and their relationship to radiographic and surgical guides
- Fabrication of radiographic and surgical guides
- Fabricate 3-unit PFM fixed partial dentures on multi-unit abutments
- Understand the differences among various implant attachment systems
- Fabricate a removable prosthesis retained by implant supported attachments

ORAL MEDICINE AND ORAL PATHOLOGY

11-14 February 2002

Quota: 130

Course Data Processing Code:
877N-99010

Course Identification Number:
B-6C-1008

Directors:

CAPT D. C. Dury, DC, USN, DDS, MS
Diplomate, American Board of Oral Medicine

CDR Schick, DC, USN, DDS
Diplomate, American Board of Oral and Maxillofacial Pathology
Head, Anatomical Pathology

Eligibility: Federal agency dentists, Active and Reserve. Non federal agency dentists on a space available basis.

Course Description: This course is designed to combine the disciplines of Oral Medicine and Oral Pathology in a meaningful and practical way. Emphasis will be given to recognition of hard and soft tissue lesions of the oral cavity. Additionally, systemic diseases and cutaneous disorders with oral manifestations will be discussed. Clinical presentation and histopathology will be correlated. Short clinicopathologic workshops with discussion periods are utilized to help formulate differential diagnosis for various oral lesions.

Anticipated learning Outcomes:

- Develop a reasonable differential diagnosis for hard and soft tissue lesions.
- Correlate clinical features of disease with soft tissue and radiographic changes.
- Explain the significance of color, shape and texture in the diagnosis of a lesion.

Continuing Education Credit: Max hrs. 28

TEMPOROMANDIBULAR DISORDERS AND OROFACIAL PAIN

25-28 February 2002

Quota: 60

Course Data Processing Code:
887T-99010

Course Identification Number:
B-6C-1006

Director:

CAPT D. C. Dury, DC, USN, DDS, MS
Diplomate, American Board of Orofacial Pain
Department Head, TMD/Orofacial Pain

Eligibility: Federal agency healthcare providers, Active and Reserve. Non federal agency healthcare providers on a space available basis.

Course Fee: Non federal agency healthcare providers: \$200.00. Checks are accepted. Make checks payable to U.S. Treasury.

Course Description: This course will provide guidelines for the evaluation, differential diagnosis and conservative management of orofacial pain with specific emphasis on temporomandibular disorders (TMD). The course following guidelines of the Academy of Orofacial Pain, will utilize case based learning and is based on current evidence concerning TMD. Differentiation between various subgroups of TMD conditions will be a primary emphasis. Rationally based multidisciplinary therapeutic regimens including occlusal appliances, pharmacotherapy, physiotherapy and surgical management will be discussed along with the proper evaluation of treatment outcomes.

Anticipated Learning Outcomes:

- Understand terminology, epidemiology and etiology of TMD.
- Understand the basic anatomy and physiology of TMD.
- Conduct and evaluate a patient history and examination, identifying pertinent information.
- Arrive at an appropriate differential diagnosis TMD.
- Prescribe dental treatment, behavioral modification, pharmacological management and/or physical therapy appropriate for specific TMD.
- Understand therapeutic rationale for fabrication of occlusal appliances.

Continuing Education Credit: Max hrs. 28

ENDODONTICS

04-07 March 2002

Quota: 130

Course Data Processing Code:
887H-99010

Course Identification Number:
B-6C-1003

Director:

CDR H. D. Moss, DC, USN, DMD, MS
Department Head, Endodontics

Eligibility: Federal agency dentists, Active and Reserve. Non federal agency dentists on a space available basis.

Course Description: This course presents a review of the fundamental concepts of endodontics and introduces recent developments in the specialty. The lectures will include brief reviews of the research, which has led to current thinking in endodontics and will provide specific suggestions to improve clinical practice.

Anticipated learning outcomes:

- Diagnose and classify pulpal and periapical pathoses.
- Understand concepts and apply treatment for non-surgical endodontics, odontogenic infections, resorptive defects and iatrogenic perforation, endodontic retreatment, dental trauma, bleaching, and restoration of endodontically treated teeth.
- Understand the concepts of and rationale for surgical root canal treatment.

Continuing Education Credit: Max hrs. 28

REMOVABLE PROSTHODONTICS IN THE COMPREHENSIVE DENTAL PRACTICE

18-20 March 2002

Quota: 130

Course Data Processing Code:
887R-99010

Course Identification Number:
B-330-0010

Director:

LCDR A. F. Hamamura, DC, USN
Staff Prosthodontic Department

Eligibility: Federal agency dentists, Active and Reserve. Non federal agency dentists on a space available basis.

Course Description: This course will provide a comprehensive review of the fundamental principles involved in diagnosis, treatment planning, and treatment of the removable prosthodontic patient. Removable and implant prosthodontics will be addressed, with the emphasis on treatment modalities within the scope of the general practitioner. A laboratory session in removable prosthodontics is planned.

Anticipated Learning Outcomes:

- Diagnose, plan, sequence and execute conventional removable prosthodontic treatment.
- Appreciate new or more efficient techniques and materials.
- Integrate essential elements of removable prosthodontics into a comprehensive general dental practice.
- Feel confident in treating patients requiring uncomplicated and moderately complex removable prosthodontic treatment.
- Know when to refer to a specialist.

Continuing Education Credit: Max hrs. 21

PERIODONTICS

25-27 March 2002

Quota: 130

Course Data Processing Code:
887G-99010

Course Identification Number:
B-6C-1010

Director:

CDR P. J. King, DC, USN, DDS
Diplomate, American Board of Periodontology
Department Head, Periodontics

CDR J. S. Buck, DC, USN, DDS
Diplomate, American Board of Periodontology

Eligibility: Federal agency dentists, Active and Reserve. RDHs working for Naval Dental Center, San Diego. Non federal agency dentists on a space available basis.

Course Description: This course is designed to update practitioners on the state of the art in periodontal diagnosis, the etiology of the periodontal diseases, the integration of periodontics into multidisciplinary plans for treatment, the execution of non-surgical and surgical treatment, and the provision of short and long term periodontal supportive treatment for the treated case.

Anticipated Learning Outcomes:

- Describe the periodontium in health and disease.
- Diagnose and understand the etiological factors of the periodontal diseases.
- Understand the principles of periodontal surgery.
- Integrate treatment for incipient to advanced periodontal disease with all other therapies for clinical patients.
- Provide periodontal treatment for patients as a part of routine general practice.

Continuing Education Credit: Max hrs. 21

PREVENTIVE DENTISTRY FOR DENTAL TECHNICIANS

01-03 April 2002

Quota: 12

12-14 August 2002

Quota: 12

Course Data Processing Code:
877K-99010

Course Identification Number:
B-330-0013

Director:

CDR J. S. Buck, DC, USN, DDS
Diplomate, American Board of Periodontology

Eligibility: Active Duty Navy Dental Technicians. All other federal agency dental technicians on a space available basis.

Course Description: This course is designed specifically for enlisted personnel actively working in preventive dentistry or periodontics departments. The course includes lectures, demonstrations, and clinical instruction working with patients in applications of preventive dentistry such as performing supragingival calculus removal, oral prophylaxis procedures, plaque control instructions, and fluoride treatments and sealant application.

Anticipated Learning Outcomes:

- Perform dental prophylaxis procedures with increased confidence and effectiveness.
- Educate patients in preventive treatment and behavior.
- Understand their role in implementation of the Navy Preventive Dentistry Program.
- Apply sealants to commence qualifications as a Navy sealant technician.

CASUALTY TREATMENT TRAINING

13-16 May 2002

Quota: 24 Officers, 30 Enlisted

19-22 Aug 2002

Quota: 24 Officers, 30 Enlisted

Course Data Processing Code:

Course Identification Number:

Director:

CAPT G. S. Benson, DC, USN, DDS

Diplomate, American Board of Oral and Maxillofacial Surgery

Eligibility: U.S. Navy active duty with preference given to deploying personnel. Active duty/deployable reserves in other armed services are welcome on a space available basis.

Course Description: A team approach to trauma treatment with an emphasis on the principles of triage and advanced lifesaving techniques in austere environment.

Anticipated Learning Outcomes:

- Understand and apply the principles of triage to mass casualty situations
- Demonstrate the indications for and techniques of advanced lifesaving measures
- Integrate skills into the dentist-dental technician team
- Understand modifications of treatment and practice in the austere environment
- Gain resources for additional study and development

DENTAL HEALTH AND WELLNESS COURSE

06-08 May 2002

Quota: 40

Course Data Processing Code:
887V-99010

Course Identification Number:
B-6C-1011

Director:
LCDR S. T. Schultz, DC, USN

Eligibility: Federal agency dentists only. Non federal agency dentist on a space available basis.

Course Description: This course is designed to provide information and guidance on how to implement current state of the art principles in preventive dentistry in the Navy's dental healthcare delivery system. It is highly recommended for all Preventive Dentistry Officers and Branch or Clinic Directors.

Anticipated Learning Objectives:

- Understand the etiology of dental caries.
- Understand the etiology and screening tools for periodontal disease.
- Understand the role of fluoride agents, sealants, chewing gum, saliva studies, and restorative materials in caries prevention.
- Understand current prevention and maintenance therapies for the periodontal patient.
- Understand the role of preventive dentistry for commands.
- Understand how to implement caries prevention strategies in current dental practice.
